

SpyderCHECKR® 24

Camera Color Correction for Photo and Video

The Datacolor SpyderCHECKR 24 target offers the accuracy of full size, spectrally designed pigment patches, in a thin, portable, affordable color target designed for both still and motion imaging. SpyderCHECKR 24's gray face provides in-camera and post-process white balance and exposure adjustment, while the color face allows you to color correct your capture automatically in Adobe® Photoshop® ACR, Adobe Lightroom®, Hasselblad® Phocus, and Blackmagic® DaVinci Resolve.

FEATURES AND BENEFITS

- **Affordable:** Professional pigment-formulated color and gray target, at an affordable price.
- **Portable:** SpyderCHECKR 24 ships in a thin, durable plastic slipcover, to fit easily in your equipment bag.
- **Professional:** SpyderCHECKR 24 offers full size, spectrally formulated pigment patches, and highly accurate HSL correction software.
- **Easy to use:** SpyderCHECKR 24 provides easy-to-use software, which automatically rotates the target from any of the four possible orientations.

"If you do not have a target, I suggest you invest in the Datacolor SpyderCHECKR system. Probably the biggest advantage of the system is that camera calibration is not limited to Raw files, but can be applied to Jpegs, and very importantly, to video! For this reason alone, it would be highly recommended for photographers moving into video."

--Lee Varis

Renowned Hollywood
Photographer

"The SpyderCHECKR 24 is a highly portable, easy to use tool for creating very accurate camera calibrations. Nothing could be simpler than incorporating calibration results into your newly opened images in Lightroom or Photoshop. Once your calibration is complete, it merges painlessly into your workflow. It does not require special effort, improving your results on the fly."
