### **1** Installation Overview

This document describes the installation of Datacolor Software to your computer's hard disk. If you have purchased your computer from us, the software will be already installed. If you purchased your own computer, follow these instructions to install our software on your computer.

Before you begin the installation, you should have all installation USB's, and Microsoft Windows\* should be properly installed on your computer.

### 1.1 System Requirements

The system requirements shown below are the minimum configuration to ensure effective operation of the standard Datacolor Weigh software. Configurations below stated requirements may work but are not supported by Datacolor.

Microprocessor	Pentium IV 1.9 GHz processor require
RAM	512 MB minimum 1 GB is recommended, and for generally increased performance.
Hard Disk	Minimum of 2 GB free disk space.
Video Monitor/ Graphics	16 MB, high-resolution graphics card. Color patch displays require 1024 x 768 (small font) or better.
Printer	Windows supported printers: Ink Jet, Laser Printers. Dot matrix printers are not supported.
Mouse	Required.
Microsoft Windows	Windows 2000 Professional, WIN XP Pro, Windows 10
Network	Networks that are 100% windows compatible. Datacolor MONITOR operates on networks compatible with the Microsoft Windows operating systems by using the application layer of the network operating system.

#### **Before You Begin**

- Microsoft Windows<sup>®</sup> should be properly installed on your computer.
- You must have Windows Administrator rights to install this software.
- **Restart the system before installing the software.** This removes any memory-resident modules that may interfere with the installation, and is especially important if you have been running a previous version.
- Install Sybase V12 database management software.
- Close all other programs that are running.
- Have all program installation readily available.

**Important, Before You Begin!** You must have Administrator Rights to install this software and you must have installed Sybase first!

## 2 Installation Procedure

To install Datacolor Weigh

- 1. Place the Datacolor Weigh USB into the port.
- 2. Select the Menu.exe

The Main Installation menu should appear automatically:

Select Install Datacolor Weigh

When the Main Installation Menu is displayed, choose "**Install Datacolor Weigh**" The Datacolor Weigh installation will guide you through installing Datacolor Weigh on your computer
