

Colibri 25.x vs Colibri 25.x Classic

Not sure which version is right for you? [Contact us](#) for a free consultation

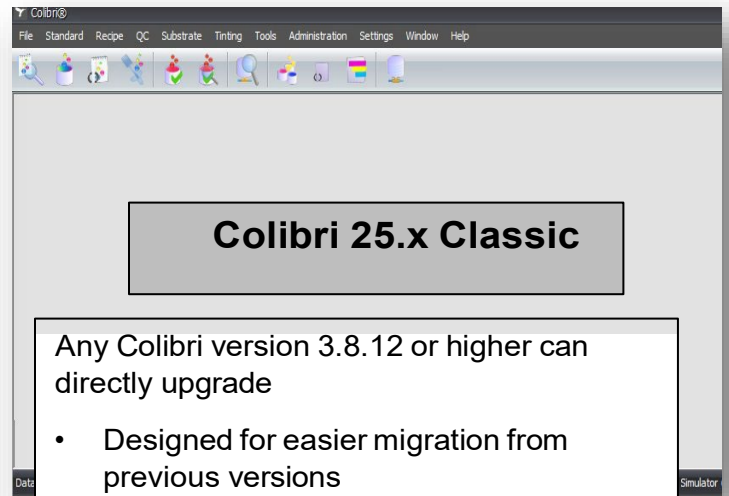

Colibri 25.x

Any Colibri version 3.8.12 or higher can directly upgrade

- Modern User Interface (HTML)
- Some Classic components (Manage Std's, color match & correction)
- New Library with advanced database search
- New ColorQuality
- Security updates
- Improved recipe correction
- Seamless database update (with SQL Server 2017 or newer)
- Classic QC Job conversion to the new ColorQuality*
- Brand Management (including Adobe Plugins) and Data Analytics using Hybrid (Rich Client/Web) Application

*May require some support

Colibri 25.x Classic

Any Colibri version 3.8.12 or higher can directly upgrade

- Designed for easier migration from previous versions
- Looks the same as 3.8.12
- Has all the security updates
- Improved recipe correction
- Seamless database update (with SQL Server 2017 or newer)
- No new user training is required
- No new features will be added, this will not be a long term supported version

Please note:

Please check Software Requirements prior to installation. Colibri 25.x requires .net and SQL to run, if you do not have either these installed already, select the [Colibri 25.x.0 with .net. and SQL Server Express prerequisites](#) or [Colibri 25.1.0 Classic with .net. and SQL Server Express prerequisites](#)

You will need administrator rights to install the software.

If you are unsure please contact your IT department or Datacolor [Support](#).
