Introduction

This document will provide information on how to install Datacolor Match Pigment on a new system or as an upgrade for an existing installation.

This document is for stand-alone computer systems.

The installation procedure includes the following steps:

- Installation of Sybase Database Management Software**

Sybase is a database management system that is required to run Datacolor software. You will need the ISO image labeled "Sybase" to begin the installation process. Sybase V17.0.10.6089 must be installed **before** installing or updating Datacolor Match Pigment.

- Installation of Datacolor MATCH^{PIGMENT}**

The Datacolor Match Pigment program is on a separate ISO image and must be installed **after** installing Sybase.

- Installation of Datacolor TOOLS**

The Datacolor TOOLS program is on a separate ISO image and should be installed after installing Datacolor Match Pigment. Please refer to the Datacolor TOOLS installation instructions located on the TOOLS ISO image.

- Software License Validation**

The installation will ask you to activate your license. Make sure you have a valid activation code, and that the maintenance date expiry of that license is greater than the release date of the installer. For Offline and Local License Server activation and installation, please refer to their respective installation instructions.

System Requirements

Follow the link below for information on the system requirements:

<https://www.datacolor.com/business-solutions/downloads>

Please contact Datacolor for Terminal Server hardware and software requirements.

Sybase Database Installation

Sybase is a database management system that is required to run Datacolor software. Sybase V17 must be installed **before** installing or updating Datacolor Match Pigment.

For step-by-step instructions, see the Installation Instructions found on the installation menu of the SYBASE ISO image. To view a PDF version, browse to the folder "Documents" on the SYBASE ISO image and select the file "Sybase Installation Guide.pdf".

Terminal Server Configurations

For information on installing Datacolor Match Pigment on a terminal server, please see the Installation Instructions found on the installation menu of the SYBASE ISO image. To view a PDF version, browse to the folder "Documents" on the SYBASE ISO image and select the file "Sybase Installation Guide.pdf".

New Installation vs. Upgrade

When preparing to upgrade your system, we strongly recommend the following:

- Restart the system before you begin the upgrade. ***This is especially important if you are running a previous release of Datacolor MATCH^{PIGMENT}.*** This is done to clear the memory of any modules that might interfere with the program upgrade.
- Store the data on the Datacolor TOOLS desktop before you begin the upgrade. See also *Datacolor TOOLS User Guide, Appendix* for a list of all files that should be backed up prior to performing an upgrade.

Firewall Blocking Messages

If you have enabled a firewall on the system, you may see a Windows Security dialog box on several occasions during the installation.

You must click **Unblock** to continue the installation.

Datacolor MATCH^{PIGMENT} Installation

Overview

The Datacolor MATCH^{PIGMENT} product includes both Datacolor MATCH^{PIGMENT} and Datacolor TOOLS. These are two separate programs contained on two separate ISO images. *Please follow these instructions, to ensure successful installation of Datacolor MATCH^{PIGMENT} and Datacolor TOOLS.*

NOTE

If Sybase V17 is not installed on the system you cannot complete the installation of Datacolor MATCH^{PIGMENT} or Datacolor TOOLS.

Before You Begin

- Microsoft Windows® should be properly installed on your computer.
- You must have Windows Administrator rights to install this software.
- **Restart the system before installing the software.** This removes any memory-resident modules that may interfere with the installation and is especially important if you have been running a previous version of Datacolor MATCH^{PIGMENT}.
- Install Sybase V17 database management software.
- Close all other programs that are running.
- Have all program installation ISO images readily available.
- Install Datacolor MATCH^{PIGMENT} before installing Datacolor TOOLS.

Installation Procedure

To install Datacolor MATCH^{PIGMENT}:

1. Download the ISO image installer and mount it on your machine. Run Menu.exe and a prompt will be displayed.

Menu.exe

Publisher: Unknown
File origin: CD/DVD drive

[Show more details](#)

Click **Yes**.

The Datacolor MATCH^{PIGMENT} installation menu should appear automatically:

To perform a command, simply click it...

If you do not see the Datacolor MATCH^{PIGMENT} installation menu, do the following:

- Click the **Start** button.
- From the Start menu, choose **Run**.
- In the Run dialog box, type **D:\MENU** and click **OK**.

NOTE

If your mounted ISO drive is a letter other than D, use that letter in the dialog box.

2. Click on **Install Datacolor MATCH^{PIGMENT}**.

The Datacolor MATCH^{PIGMENT} installation will prompt you to select a language:

3. Select the appropriate language and click **Next**. The License Guard components will now install.

4. After License Guard is installed, the software will check if a license is installed. If there is no license installed, a License Guard window will pop up with a drop-down box selection of licenses you can activate.

5. Choose a license to activate and click the "Launch License Info" button and the License Info window is displayed:

License Info

 Request Completed

Your request has been processed successfully. Click Finish to continue.

Cancel Back Finish

Click Finish and close the License Guard window.

Note: If your maintenance contract is expired, a “Maintenance Date Expired” dialog is displayed like the one below. Just click the “OK” button and it will proceed to install if the application version is 26.1.

6. The installation will begin and the Installation Wizard will display:

Click **Next** to continue.

7. A software license agreement is displayed:

8. To continue with the installation, you must accept the agreement and click on Next.

9. The program confirms the folder location for Datacolor MATCH^{PIGMENT}:

- To select a different location for programs, click **Browse**.
- To accept the default, click **Next**.

10. The installation confirms the location for the **Common Applications Data** location.

The common applications location is: **C:\ProgramData**.

You should accept the default locations unless otherwise directed by Datacolor applications.

Click **Next** to accept the default locations.

Select Database Location

The installation confirms the folder location for the Datacolor MATCH PIGMENT database files.

- To select a different folder for the database, click **Browse**.

The database location is: C:\ProgramData\Datacolor\Database\Database_Global.

11. Desktop and Shortcut Options.

Click **Next** to continue.

12. Program Folder Selection

Click **Next** to continue.

13. Shared Components will now install.

The Datacolor MatchPigmentNavigator window will launch. This component contains elements that are shared with the Datacolor TOOLS application. This screen will display:

Click **Next** to continue.

14. The MatchPigmentNavigator wizard will continue.

Click **Install** to continue.

15. A progress bar will appear on the window and when it fills, the MatchPigmentNavigator installation will complete.

Click **Finish** to continue.

16. The installation will now begin:

17. Installing the Instrument Drivers:

18. Pick the correct language and click on Next then it will continue installing additional components:

19. It will prompt if you want to allow public and private access to this app.

Click on "Allow"

20. The MatchCOM matching engine is installed:

21. After the installation is completed, you will see this screen:

22. You will be prompted to reboot your computer.

You must reboot before you can start the Datacolor Match Pigment program. If you select No, you will receive the following message:

Click OK to reboot your computer.

Datacolor TOOLS Installation

Overview

Datacolor TOOLS is companion product to Datacolor MATCH^{PIGMENT}. It is contained on a separate ISO image and is loaded under a separate installation process. You should install Datacolor TOOLS after you install Datacolor MATCH^{PIGMENT}.

NOTES

If you are upgrading from a previous version of Datacolor TOOLS, you should backup the data on the TOOLS desktop, and any customized files such as customized form files. *See also Datacolor TOOLS User's Guide, Appendix, File Backup for a list of the relevant files.*

Starting Datacolor MATCH^{PIGMENT}

1. To start Datacolor MATCH^{PIGMENT}, click on the Datacolor MATCH^{PIGMENT} icon on your desktop:

NOTE

You can also start by clicking **Start/Programs/Datacolor Spectrum/Datacolor MATCH^{PIGMENT}**.

2. The login window is displayed:

You must login with a valid user name and password.

- The default user name is “user”.
- The default password is “CC3”.
- Under Advanced Settings is an option to use a DSN other than the default, if you have created additional Match Pigment databases. The only option for first-time users will be CC2000_DB.

When the login is successful, the Data Navigator and the Formula Central program windows will open.

NOTES

User names and passwords are not case sensitive.

The default user and password can be changed. *See also Datacolor MATCH^{PIGMENT} User’s Guide, Admin for instructions to change the login and password.*

You can customize the program modules automatically opened for each user. *See also Datacolor MATCH^{PIGMENT} User’s Guide, Admin for instructions to customize this display.*
